Agricultural Biotechnology in Europe (ABE) is a communications programme aimed at providing factual and science based information about agricultural biotechnology. Members of ABE are international companies who have pioneered the development of agriculture biotechnology and who strongly believe that biotechnology has the potential to be of great value to Europe's agricultural and food industries. Members of ABE are committed to developing and commercialising products in a responsible and safe manner, always after extensive scientific research processes and trials. ABE's communications activities are based on the fact that any technology's public acceptance must involve processes that lead to wide understanding and acceptance.

The agricultural biotechnology industry is therefore working with various organisations across Europe to improve transparency and to foster a useful dialogue on GM technology. ABE works on wide-ranging communications initiatives with a variety of stakeholders – farmers, the food and feed industry, retailers, the media, policy makers and others – with the aim of listening to and addressing the concerns of all Europeans about agricultural biotechnology. We also act as a conduit to publicise information about the industry, GM technology and scientific developments. The opinions of diverse groups – farmers, consumers, trade and industry, scientists and governments – all help to promote a dialogue that enables an informed public debate

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
