Applied Molecular Evolution (AME) is a leader in applying directed molecular evolution to improve healthcare by discovering, optimizing and developing human biotherapeutics. Since its inception, AME's principal focus has been on applying its proprietary AMEsystem™ technology platform to the full range of protein therapeutic candidates including antibodies, cytokines, hormones and enzymes to develop novel human biotherapeutic candidates.

Since February 2004, AME has been a wholly-owned subsidiary of Eli Lilly and Company and is an integral part of Lilly's research organization. Lilly, a leading innovation-driven corporation is developing a growing portfolio of first-in-class and best-in-class pharmaceutical products by applying the latest research from its own worldwide laboratories and from collaborations with eminent scientific organizations. Headquartered in Indianapolis, Lilly provides answers – through medicines and information – for some of the world's most urgent medical needs.

While geographically separate, AME works closely with Lilly colleagues in Indianapolis and around the world, sharing a corporate legacy of integrity and commitment to quality that spans more than a century.

Recent Publications by Lilly Corporate Center:

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
