Axaron Bioscience AG is a biotech company that aims to develop drugs which address the large-volume and fast growing neurodegenerative disorders market. The company has built an attractive portfolio of compounds focused on the treatment of stroke, Spinal Cord Injury (SCI), ALS (Amyotrophic Lateral Sclerosis) and Parkinson's disease. The most advanced drug candidate AX200 has already entered phase II stroke trials at the end of 2004. Another compound, AX201 is scheduled for phase II clinical trials for stroke in 2006. Based on its proprietary D FINE platform, Axaron is able to quickly identify and develop drugs with neuroprotective or neuroregenerative properties. This enables the company to generate a constant flow of new drug candidates.

## BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
