Humanity has come a long way. With gradual effort, today we are in a position to prevent major life-threatening illnesses. However the quest for healthy life is an ever-lasting journey. Biological E. has been devoted to this, ever-since its inception. The creative foundations of Biological E. were laid during the most eventful moment of India - the swadeshi movement, when the nation sought to become independent sound and self-reliant.

Launched and led by the U.S. trained founder president Dr. D.V.K. Raju, Biological E. was among the first of concerted endeavors to promote indigenous pharma industry and make critical healthcare like preventive immunologicals accessible to the common man.

Since its inception in 1953, Biological E. has come a long way; enhancing its strengths and expanding its horizons. Today, Biological E. has a formidable presence in sera & vaccines, bulk drugs, formulations and herbal products.
