Innovation is the key driver of growth. Creating and adopting new technologies allows companies to generate faster and more sustained growth. But it is not something you can do alone. Canesis assists in the commercialisation and implementation of high value ideas and knowledge, providing an important competitive edge. Knowledge is the most valuable currency in today's world. Canesis Network Ltd evolved from WRONZ and Wools of New Zealand Ltd, which have built an international reputation, over the past 40 years, as a world-class provider of research, development and technology services. Canesis adds value to businesses via wide ranging technical and scientific expertise and capabilities. Canesis also partners companies in innovative ventures to access preferential research and development services and establish commercialisation linkages.

This is all done with an enthusiasm and passion for the work, an eye on the world stage, an entrepreneurial spirit with a strong sense of integrity and the desire to succeed. A co-operative and versatile organisation with the vision to look ahead and the heritage to look back on.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
