CapMed continues to be a leader in Personal Health Records (PHRs), developing one of the first PHR applications in the mid-90's. The organization was founded by two doctors in Huntsville, Alabama in 1992. Ira Denton, M.D., and his wife Judy Denton began the development of a computer-based patient medical records software system. They felt that "completing the information circle" among doctors and patients would be essential to shared decision-making and mature relationships among patients and their care teams. They integrated the system into Dr. Denton's neurosurgical office in 1991 with remarkable results, and went on to found CapMed in 1992. CapMed made the shift from its physician clinical record system to focus on personal health management in the late 1990s.

In 2002, CapMed launched the first-ever patent-pending Personal HealthKey™ for secure portability of health information on a key chain using USB flash disk technology. CapMed was subsequently acquired by Bio-Imaging Technologies, Inc. (NASDAQ: BITI), becoming the cornerstone of Bio-Imaging's personal health management solutions division.

CapMed continues to be an innovator in personal health management solutions, addressing patient privacy concerns with tangible solutions that engage patients and enable interoperability. CapMed's solutions have been showcased as a means to help patients gather information through electronic transfer from multiple providers, to upload information from home-monitoring devices, to record and track all types of information to lab values and exercise regiments to medications and medical images; as a means to exchange this information with electronic provider systems using a secure online exchange; and as a means of point-of-care through the ubiquitous USB port (patient-chauffeur model). To date, more than 500,000 Personal Health Records and Personal HealthKeys have been distributed through partnerships with hospitals, pharmaceutical companies, managed care organizations, employers and OEM partners.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service

- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
