Boston Life Sciences, Inc (NASDAQ: BLSI) is a biotechnology company engaged in the research and development of biopharmaceutical products for the diagnosis and treatment of Central Nervous System disorders. Our energy and focus in this area are reflected in several important initiatives. Our molecular imaging program has a product candidate, the ALTROPANE® molecular imaging agent, in phase 3 clinical development. ALTROPANE® is a diagnostic tool intended to aid in differentiating Parkinsonian tremors from non-Parkinsonian or Essential Tremor. ALTROPANE is also being assessed in Phase II trials for diagnosing ADHD. Through our licensing and research collaboration with Children's Hospital Boston, Boston Life Sciences maintains a world-class position in the field of regenerating nerve axons. Our sponsored scientific research in this ground-breaking technology may someday make possible therapies leading to functional recovery following stroke, spinal cord and ocular injuries. Finally, our program in Parkinson's Disease aims to provide a therapeutic solution to managing the symptoms as well as to slowing the progression of the disease.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo

- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
