Welcome to George Eby's ColdCure.Com web site. This is a multi-gigabit sized site covering the common cold and a number of other important health issues. This site has become a teaching resource concerning natural treatments for disease, and it is used by naturopathic physicians (NDs), allopathic physicians (MDs), pharmacists (RPhs), academic researchers and the public. George Eby believes that "natural alternatives" should be the "mainstream" of medicine, with pharmaceutical drugs used only as distant alternatives. BUT, the power of marketing has greatly overshadowed biomedical science, and we opt for expensive drug treatments rather than nearly free natural treatments. George Eby believes most "chronic diseases" are due to certain nutritional deficiencies, often zinc and magnesium (and in aging, taurine and arginine). In brief, if we knew enough about nutrition, we would need very few drugs. The links in the MENU address diseases as disparate as a totally free cure for chronic sinusitis (chronic rhinosinusitis) by humming, allergy, asthma, depression, smallpox, brown recluse spider bites, ADHA, navicular disease in horses, cardiac (and staying alive) issues, aging, herpes simplex, menstrual cramps, and childhood leukemia. See his "Message to the United States Congress" about the extremely dire consequences of dietary magnesium deficiency and calcium excess. Review his zinc and angina pectoris pages for a potential cure for most serious and lethal heart issues, which currently cost this country many billions of dollars per year. His most frequently read page concerns treating depression with magnesium. Use the search engine at the lower left of this page for your special "key words". Find the page where George Eby writes: "As you read this essay, please ask yourself if it is actually possible that modern medicine is built upon a foundation of quicksand (low magnesium and high calcium)?", and to that one might add "low zinc?"

Press Releases on Eby Pharma, LLC:
