The ocean represents a virtually untapped resource for the discovery with pharmaceutical potential" National Research Council (USA) Understanding the Ocean's role in Human Health."Drugs from the Sea" is the most familiar area of marine biotechnology. Looking for compounds in marine organisms is a logical follow on from the hugely successful terrestrial natural products drug discovery programmes. Drugs derived from natural products are worth some \$22 billion annually (Journal of Natural Products 1997). Of the 28 phyla of animals only two are not found in the sea. However, it is only comparatively recently that marine species have been seriously studies as a source of new drugs.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months

old.
