Iris Diagnostics, a division of IRIS International, Inc., manufactures and sells urinalysis systems for use in hospitals and commercial laboratories worldwide. These systems perform both chemistry and microscopic analyses. Iris Diagnostics' automated systems are designed for workloads ranging from the largest hospitals to smaller laboratories and process anywhere from a few specimens to hundreds of specimens per day. Iris Diagnostics' systems are designed to provide users faster and more complete results, plus labor savings over manual methods of performing microscopy, one of the most labor intensive procedures in a clinical laboratory.

Iris Diagnostics' in-vitro diagnostic (IVD) imaging systems are based on patented and proprietary automated intelligent microscopy (AIM) technology for automating microscopic procedures performed in clinical laboratories. AIM combines Iris Diagnostics' capabilities in automated specimen presentation, high-speed digital processing hardware and software to classify and present images of microscopic particles in easy-to-view displays. Iris Diagnostics has created a family of automated microscopy systems. There are more than 450 such systems installed worldwide.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
