Lipomics Technologies provides industry leading metabolic profiling for drug discovery and development, patient monitoring and personalized medicine.

The Company's proprietary analytical technologies generate a comprehensive, accurate and quantitative profile of lipid metabolites. A broad range of bioinformatics and analytical tools map these profiles to activity levels of underlying biochemical pathways.

Through these tools, new insights are gained into biological and metabolic changes induced by disease, drug action, nutritional or lifestyle influences.

In partnership with pharmaceutical, biotechnology and nutrition companies, Lipomics uses its technologies to discover new biomarkers, speed drug discovery, improve clinical trial stratification, reduce late-stage drug attrition, develop early tests for monitoring drug response and enable individualized health management.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
