Methodist Health System is one of Dallas's largest and oldest nonprofit health systems. We've gone through lots of changes over the decades, but our mission has always been the same—commitment to the health and well-being of our community. The Methodist vision started in 1924, with a group of Methodist ministers and civic leaders devoted to bringing quality health care to the growing city of Dallas. With the support of the Methodist Church, local congregations and other donors, our founders built Dallas Methodist Hospital, a 100-bed facility south of the Trinity River, overlooking downtown Dallas.

After persevering through the early years and the Great Depression, Dallas Methodist Hospital began to truly thrive and expand in the 1940s and 1950s. In 1951 a three-story student nurse's residence was constructed near the hospital and in 1966 the Martin and Charlotte Weiss Educational Building opened, providing classroom space for the nursing program and a large auditorium for community programs. By the 1960s we'd grown to include 420 beds, more than four times our original size.

Throughout the 1970s and 1980s, Methodist Hospitals of Dallas continued to grow. In 1975 Charlton Methodist Hospital opened its doors to serve the growing communities of southwest Dallas County. This dedication to the community was further evidenced in 1985 when Methodist's board of directors made the decision to remain a viable entity in southern Dallas County. The board rededicated itself to the Oak Cliff community and its people and initiated a \$100 million building program. As a result, Methodist Charlton and Methodist Dallas Medical Centers continue to grow alongside the communities they have served for so long.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast

service

- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
