The Company was founded in April 1997 by Robert Rosenbluth and Brian Cox and incorporated as MicroVention, Inc. in September. MicroVention established the strategic objective of developing and marketing medical devices, which will enable or significantly improve the treatment of diseases in small vessels. Joining the team in December of 1997, Rob Greene brought key neurovascular device experience. After development of early concepts and prototypes of devices for the treatment of acute embolic stroke and embolization of cerebral aneurysms, the company narrowed its focus to aneurysm therapy. MicroVention maintains important stroke device technology and intellectual property and continues to monitor the acute stroke therapy market as a potential future product area.

## BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search

- engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
