Protein Lounge is a leader in the field of system biology. We have developed many interactive web-based databases and software to help the life-scientists understand the complexity of systems biology. Systems biology efforts focus on understanding cellular networks, protein interactions involved in cell signaling, mechanisms of cell survival and apoptosis leading to development or identification of drug candidates against a variety of diseases. In the post-genomic era, one of the major concerns for life-science researchers is the organization of gene/protein data. Protein Lounge has met this concern by organizing all necessary data about genes/proteins into one portal. Protein Lounge has revolutionized bioinformatics by constructing the first complete siRNA target database, a complete Peptide-Antigen target database and a Kinase-Phosphatase database. We have also developed the largest database of illustrated signal transduction pathways, which are interconnected to our extensive protein database and online gene/protein analysis tools. Protein Lounge is an ideal site for both life-science researchers as well as students. Our information is very detailed and still explained in an easily understandable manner. You can view a list of our current databases and tools below

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service

- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
