Collateral's initial non-surgical gene therapy products under investigation are designed to promote and enhance angiogenesis, a natural biological process which results in the growth of additional blood vessels, to increase levels of blood flow to oxygen-deprived tissues.

The Company's angiogenic products are administered using methods of gene therapy based on non-surgical adenoviral vector delivery of angiogenic genes. In addition to the Company's angiogenic product candidates, the Company is actively researching gene therapy products designed to increase responsiveness of the heart to adrenergic stimulation and to stimulate heart muscle regeneration.

The Company's lead product candidate, GENERX™ (Ad5-FGF4) is a non-surgical angiogenic gene therapy, which is being developed as a potential treatment for patients with stable exertional angina (chest pain) due to coronary artery disease (CAD).

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
