Dr. C. Anthony Altar is President and Chief Scientific Officer at Psychiatric Genomics. His research team is responsible for gene discovery, medicinal chemistry, and drug discovery efforts. Dr. Altar has published 120 articles in peer-reviewed journals that include Science, Nature, PNAS, and the Burger's Medicinal Chemistry series. He pioneered methods for receptor localization using computerized image analysis and discovered the serotonin/ dopamine receptor binding patterns of antipsychotic drugs, which typify the atypical antipsychotics now in use. His team at Regeneron identified brain actions of neurotrophic factors, including roles in human depression, now an experimental clinical approach. As Director for Global Neuroscience Research at Otsuka America Pharmaceuticals, Dr. Altar led the team that discovered and co-developed aripiprazole (Abilify), recently FDA-approved.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search

- engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
