Reaction Biology Corp. (RBC) was founded on the belief that as technology gets smaller, it should get simpler. Screening a million compounds against a panel of enzymes shouldn't require a room full of robots, three months' lead time, and millions of dollars. At RBC, we've taken screening technology to the next level by making it simple. We print 6,600 dots of compounds on a conventional glass slide, spray a miniscule amount of target, and scan in an instant. Our new DiscoveryDot™ technology saves you time and money, while delivering the quality data you require.

## BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
