Welcome! The University of Colorado Family Medicine Residency at Rose was built upon the oldest University-affiliated Community-based Generalist training program in the nation. Begun in 1947 as a two-year General Practice residency, the program converted to a three-year Family Medicine program in 1970. The program's mission is to train Family Physicians capable of practicing in a wide variety of settings. The residency highly values residents who are motivated adult learners and are interested in life-long education. The residency is rotational in nature with a strong presence in the model family medicine center. The program emphasizes the care of the whole person in the context of family and community. The Rose Family Medicine Residency Program has been training family physicians since 1970, the majority of whom are practicing in Colorado. The program is based at Rose Medical Center (RMC), a community hospital located near the University of Colorado Health Sciences Center campus. RMC is committed to graduate family medicine education. Graduates of the program are broadly trained to practice in multiple settings.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core

information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
