Daiichi Sankyo Pharma Development is the product development arm of the U.S. organization, engaged in Clinical Development, Translational Medicine & Clinical Pharmacology, Regulatory Affairs & Risk Management, Informatics & Knowledge Management, Biostatistics and Data Operations and Development Research. We conduct clinical studies and expedite product registrations for the United States and Europe, and collaborate with our Tokyo parent company on all of our global product development projects as well. We are led by a group of highly experienced pharmaceutical executives who have gained broad experience at some of the world's leading pharmaceutical companies. In addition, we have a significant number of senior staff from Japan to assist in and coordinate our global development activities. Along with our staff of about 200 employees, we utilize outsourcing strategies for additional functional support. One such example is our partnership with MDS Pharma Services to establish the company's first collaborative clinical pharmacology unit. The unit is located in New Jersey and focuses on the evaluation of novel treatments for diabetes and lipid disorders.

Daiichi Sankyo, Inc. has just completed the integration of its two legacy companies that resulted in a new R&D organization -- including new processes and improved decision-making systems aimed at speeding global development.

## BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
