Corvas International, Inc. is a biopharmaceutical company focused on development of a new generation of drugs that address today's largest medical markets, cardiovascular disease and cancer, based on our expertise in vascular biology and protease modulation. We have a strategic alliance with Pfizer Inc for the development and commercialization of our novel anti-inflammatory agent (rNIF or UK-279,276) to treat ischemic stroke. Completion of patient recruitment into the Phase IIb clinical trial of UK-279,276 was recently announced with results expected in mid-2002. We expect to initiate a Phase IIb clinical trial for the treatment of unstable angina in 2002 with our potent anticoagulant rNAPc2. Our cancer drug discovery programs are focused on the development of therapeutic drugs that modulate the activity of serine proteases associated with the growth and progression of solid tumors through the use of innovative chemistry and biology-based platform technologies. We have developed our portfolio of drug candidates by integrating an in-depth knowledge of serine protease inhibition and the biology of thrombosis and, more generally, vascular biology with advanced and proprietary drug discovery and design technology.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
