SLP Innovations Limited is a limited liability company based in Finland. The company provides solutions to companies involved in the discovery, development and commercialization of biotechnology. Rather than being just a service provider, SLP works in partnership with its clients to create specific, tailor-made solutions that meet specific needs but also integrates into the values and goals of its clients. SLP operates on the unique principle of using a flexible organizational structure that brings together complementary expertise in Finland and in the UK in its core team supported by a network of affiliates knowledgeable in biobusiness. Recognizing the particular significance of partnering in the development and commercialization of biotechnology, SLP focuses its core business on searching, creating and implementing technology partnerships. Though market research and intelligence is not a core business for SLP, the company will cooperate with its partners in Finland and the United Kingdom to provide such services to complement its core business. This approach allows SLP to do what it does best: biobusiness. In addition to creating access to international partners, SLP also helps to develop the internal biobusiness capabilities in our client companies. This we do by designing and providing a learning strategy for our clients and providing training in the management and marketing of innovations in international firms. SLP provides this solution through its network of experts from academia and business practice.

The vision of the company is to grow and develop sustainable competitive advantage in its business area by creating, maintaining and continually updating knowledge expertise in biobusiness and through this become a reliable international biotech service company that understands the needs of the market and provides solutions that meet these needs. Mission Statement The mission of the company is to be a reliable partner to our clients by working together with them to develop internal capabilities through training and to find and develop external business partnerships and linkages for the development, commercialization and internationalization of biotechnology.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
