Established in 1974, the St. Paul Heart Clinic is the Twin Cities largest, most advanced independent cardiology clinic, providing specialized care in virtually all aspects of cardiology. Our cardiologists not only specialize in the diagnosis and treatment of heart disease, but also pioneered the concept of subspecialization within cardiology in the Twin Cities. They have further refined their skills by sub specializing in electrophysiology, interventional procedures, noninvasive diagnostics and research. By sub specializing, St. Paul Heart Clinic staff provides you with both the breadth and depth of cardiology found only in the largest, most highly sophisticated practices in the country.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password

- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
