USB Corporation has a long-standing reputation as a leader in the life sciences, fueling innovation in basic research, drug discovery and molecular diagnostics. The company history reaches back to the 1970s, known then as United States Biochemical, a company that specialized in supplying biochemicals to the research market. In the 1980s, a collaboration with scientists (Tabor & Richardson) at Harvard University led to the commercialization of Sequenase™ DNA Polymerase and the first easy-to-use DNA sequencing kits. This technology pioneered development of thermostable enzymes and automation for high-throughput sequencing.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
