Creating medical illustration, medical legal illustration and anatomically correct chocolate is what Visual Anatomy does best.

Visual Anatomy (VA) specializes in digitally created illustration in both black and white and color. We are experienced in creating everything from complex, full color medical illustrations, charts and graphs to very simple medical graphics and diagrams. VA creates medical illustrations for Publishers, Physicians, Pharmaceutical Companies and Medical Journals all over the country. Clients enjoy our highly accurate, uncluttered style of illustrating for even the most complex medical subjects. Click on the gallery of medical illustration button to view samples of our recent medical images.

Visual Anatomy also specializes in creating medical legal illustrations for attorneys. Our demonstrative illustrations are always made to be specific to your particular case. As with all our illustrations accuracy is a priority. For more information on our courtroom graphics or to view sample illustrations click on the medical legal button above.

In 2002 VA introduced a unique line of sumptuous, anatomically correct chocolate organs and body parts. Anatomically correct chocolates are as delicious as they are fun and unique. Each piece is hand molded in the finest quality milk, dark or white chocolate. Current selection of chocolate body parts includes: heart, lungs, brain, vertebrae, kidney, eye and knee bones.
