We work with scientists to design and develop new, innovative tools for biological, chemical and genetic research. We know research and we know tool development. We have over 46 years experience in academic, pharmaceutical, immunological and biotech research.

We are the leader in making innovative replicators and manifolds to fill, aspirate, evaporate, mix, dilute, transfer, assay, screen, macroarray, microarray, spot and blot in, to and from microplates. Whether you call them Replicators, Pin Tools, Pinners, Pin Thingies, Gridders, Arrayers, Froggers, Prongers, Hedgehogs, Dog Brushes, Dotters, Spotters or Stampers we have the largest and most varied collection. We make both manual and robot pin tools for assay, compound screening, High Throughput Screening and ultra HTS. If we don't have what you need, we will build to order. We also now offer our own Pin Tool Robot and a complete line of unique reagent reservoirs.

We also invented the Alligator Tumble Stirring System, the Vortex Tumble Stirring Systems to magnetically mix in microplates, vials, tubes and syringes, the Magnetic Levitation Stirring System to mix in deep well microplates and the Bubble Paddle to re-suspend particulates and SPA beads in reservoirs for microplate pipetting, and the sealed bearing Bubble Paddle to keep magnetic beads in suspension. We specialize in mixing and heating any size and shape vessel and very viscous liquids and slurries. We make many of our own Stir Elements and Magnetic Stir Bars and are the distributor for others. If you need liquid handling, heating blocks, mixing and array capabilities in 8, 12, 16, 24, 48, 96, 96 deep well, 384, 384 deep well and 1536 well microplates then you have found the right web site.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password

- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
