Welcome to VRMNY.com, the web-site for Vitreous-Retina-Macula Consultants of New York, one of the premier single-specialty retina groups in the world. We are the largest retina practice in New York and one of the first to be established in the United States as a whole. The doctors of Vitreous-Retina-Macula Consultants of New York are leaders in the field who have been instrumental in the development of world-wide standards for treatment of medical and surgical retinal disease. The physicians have published literally thousands of journal articles and authored several of the major standard texts in the field. They are respected educators and frequently lecture across the country and in Europe and Asia. In this site, we describe our practice and provide important clinical information for patients and their families. As this site develops, we will be adding topics to the Patient Information section and updating the materials as new information becomes available in the field.
