Northstar Neuroscience is pioneering the development of cortical stimulation therapies. We are working with healthcare partners to develop clinical applications from the science of neurostimulation. Our solutions are tuned to the individual needs of patients – offering greater hope for the renewal and recovery from neurological injury, disorder or disease – enabling them to regain their quality of life. Northstar's Renova™ Cortical Stimulation System is an investigational device that is in clinical trials for several indications, including stroke motor recovery, aphasia, tinnitus and depression. Northstar Neuroscience has developed the proprietary Renova™ Cortical Stimulation System* that delivers targeted electrical stimulation to the outer surface of the brain - the cerebral cortex. The cortex controls or influences many important neurological functions. Because stimulation is delivered to the protective outer layer of the brain, it is more easily accessed than deeper brain structures resulting in a less invasive surgery. Cortical stimulation, the process of stimulating sections of the cerebral cortex, is being investigated for several clinical applications including stroke, tinnitus and depression. * Caution: Investigational device. Limited by Federal (or United States) law to investigational use.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
