AutoImmune Inc. is a biopharmaceutical company developing a new class of orally administered pharmaceutical products for the treatment of autoimmune and other cell-mediated inflammatory diseases and conditions. At the start of 1999 the Company was conducting clinical trials for the following products: Colloral(R), for the treatment of rheumatoid arthritis, and AI 502, for the treatment of chronic transplant rejection. A third product, AI 401, for the treatment of Type 1 diabetes, is in Phase II clinical trials supported by Eli Lilly and Company ("Lilly") and the National Institutes of Health ("NIH"). The Company believes, based on preclinical and clinical data, that its proprietary approach to therapy can induce tissue-specific immunosuppression without toxicity or significant side effects. Additional clinical and commercial advantages of this approach include the ability to administer products orally (the preferred method of treating chronic diseases) and the potential for application to a variety of inflammatory diseases and conditions.

Recent Publications by AutoImmune Incorporated:

- [Antibody library selection by the {beta}-lactamase protein fragment complementation assay.](#)
*Protein fragment complementation assay (PCA) is based on the interaction...*3rd October, 2008
Department of Medical Sciences, and Interdisciplinary Research Centre on- Protein Eng Des Sel. 2008
Sep 30. ([DOI Direct Link](#))
- [Prediction and prevention of autoimmune skin disorders.](#)
*Autoimmune diseases can be preceded by a symptom-free phase which is...*26th September, 2008

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's relate service indepth.

The annual cost is \$495.00 for established organizations and \$295.00 for organizations less than 12 months old.
