It can be a question or a statement, but here at AutoMate Scientific, it is our philosophy. Physiology research places extraordinary demands on industrial equipment: millisecond liquid switching, picoliter delivery, microvolt accuracy, sub-micron stability. Products from AutoMate Scientific are Ready for Research. You probably didn't go into biology to design your own electronics. Why waste months working the bugs out of a home-made perfusion rig? Spend your time learning how the brain works instead of soldering cables.

AutoMate Scientific has manufactured scientific instrumentation since 1992. We compete with larger companies by using our experience to build better products with more physiology features you need. Our engineers work constantly to create innovative new tools to extend your research while keeping costs down. Each System is built for your specific application - so you can start using it right out of the box. We design quality into every product using first-class components and supplies to manufacture the best equipment possible. Maximize value by ordering a complete system, or save money buying just the pieces you need. Our service doesn't stop until everything is working exactly how you want it to.

From anesthesia to Xenopus research, scientists world-wide place their trust in AutoMate Scientific's products and service every day. Imagine what you can do with the extra time you save.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic

- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
