Email: cust_service@genelink.com

Gene Link, Inc. is a 7-year-old small dynamic privately held biotechnology company incorporated in the State of New York. It is dedicated to fundamental and applied research on genetic/biomedical projects relating to gene mapping, localization and detection and marketing of our services and products in these areas. Since inception, Gene Link has acquired a reputation for quality, consistency and confidence in the services and products it provides to the research communities worldwide. Our services and products are supported and ensured by our commitment and constant efforts to excel. It has experienced rapid growth every year, corresponding to accumulated growth of ~500% in revenues. Gene Link is situated in Westchester County of New York in a ~20,000 sq. ft state of the art building. A location ideally suited to growth and strong interaction with prestigious nearby universities, biotechnology and pharmaceutical companies in New York, New Jersey and Connecticut.

Gene Link fosters customer satisfaction and loyalty by maintaining a close personal relationship with our customers, and by offering technical support for the applications of our products. We routinely assist our customers regarding the design of their experiments and the solving of their application problems. Gene Link customers are Universities, Research Institutes, Pharmaceutical companies and Hospitals involved in research. These customers are located worldwide.

Gene Link is a leading supplier of custom oligonucleotides for use in PCR, sequencing, cloning, and mutagenesis. Gene Link services include genotyping, sequencing and gene construction. Gene Link offers as well a wide variety of other molecular biology products such as, fluorescent probes and non-radioactive gene detection systems for human genetic disorders.

Gene Link's research and development activities focus on developing novel gene detection systems. Gene Link is in the process of developing research products to aid scientists with detection of genetic disorders, specifically triple repeat disorders (Fragile X, Myotonic Dystrophy, Huntington etc.). Also available from Gene Link are kits for research purposes designed for genotyping Fragile X syndrome, SRY, Y, XY and sickle cell

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services.

BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
