Incenta is a young, Cambridge UK "chemitech" company operating within the biotech sector. The company enshrines a structure-based drug design business focused on the generation and exemplification of proprietary, potent and selective compounds that improve human health.

Incenta was launched in November 2000 by Bill Turnell and Alan Goodman, together with founding scientists Dr Manoj Ramjee and Dr Martin Quibell. The company was established to exploit the distinctive but complementary skills of Bill, Manoj and Martin in the use of structure activity relationships of natural ligands to design, synthesise and test novel drugs and candidate vaccines.
