The Institute for In Vitro Sciences is a non-profit, technology driven, foundation dedicated to the advancement of alternative test methods. The Institute functions as a independent technical and educational resource which strives to coordinate various efforts taking place in the field nationally and harmonize them with international activities. To meet these goals the Institute (1) provides non-animal research and testing services,(2) sponsors workshops and training courses in in vitro methods, and (3) creates a forum where Industry, Government and Animal Welfare proponents can meet to determine constructive programs which effectively reduce animal use.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
