Kendro Laboratory Products - A worldwide company formed by the merger of Heraeus Instruments and Sorvall.

Corporate description

Kendro Laboratory Products is a leading player in the global laboratory marketplace, and was formed in May 1998 through the merger of the German laboratory equipment manufacturer Heraeus Instruments and the American centrifuge manufacturer Sorvall Products, L.P. The merger brings together two organizations with complementary product lines, and brand strengths built solidly on quality, competence, reliability and service. Heraeus and Sorvall products are known throughout the world - and with the formation of Kendro, they are now available from a single point of supply. A broad equipment portfolio spans centrifuges for every application, cell separation systems, ovens, incubators, safety cabinets, furnaces and freezers - all backed by established, reputable sales and service teams in Europe, The Americas and the Far East.

The global Kendro organization has revenues in excess of \$170 million and more than 1000 employees worldwide.

Markets served

Kendro's worldwide customer base spans a diverse range of markets. The company serves the biotechnology, pharmaceutical, clinical, healthcare and blood processing sectors, and supplies much of the equipment needed by university, commercial and government laboratories. Kendro ovens and furnaces are also used for many industrial process and quality control applications.

Major products

Superspeed centrifuges: RC-5B Plus/RC-5C Plus/RC-26 Plus Series of 'workhorse' floor model superspeeds, delivering optimal separation performance without belts or complex vacuum systems.

Ultraspeed centrifuges: Discovery™ Series ultracentrifuges, for separations at up to 802,006 x g - the smallest, quietest and most heat-efficient floor model ultras currently available.

Micro-ultraspeed centrifuges: Compact, floorstanding RC-MGX Series micro ultras for small samples, capable of separating lipoproteins and banding DNA at 900,000 x g in under 2 hours.

Lowspeed centrifuges: Capable of accommodating 12 liters per run in six large 2-liter bottles, the RC12BPÔ offers twice the capacity of competitive lowspeed centrifuges for high-throughput sample processing applications at up to 7,333 x g.

Intelligent benchtop centrifuges: The Biofuge Stratos has a drive spindle - unique for a refrigerated benchtop centrifuge - that allows 10 different rotors to be spun at forces of up to 50,377 x g.

Microliter centrifuges: Ultra-compact Biofuge Pico (non-refrigerated) and Biofuge Fresco (refrigerated)

microliter centrifuges accommodate a 24-place aerosol-tight rotor that reaches 16,060 x g in just 15 seconds. Cell separation systems: CENTRITECH® Cell Separation Systems ensure gentle cell harvesting and maximized biomass in perfusion cell culture.

CO2 incubators: A broad range of incubators for cell and tissue culture, each model providing optimal conditions for growth, protection against drying out, and the maximum possible protection against contamination.

Class 2 safety cabinets and clean benches: Kendro clean benches ensure outstanding safety for applications in biotechnology, microbiology, medicine and the pharmaceutical industry.

Freezers and cooling systems: Kendro freezers, plasma shock freezers, storage cabinets and blood storage cabinets are ideally suited for the safe and economical storage of biological samples.

Vacuum drying ovens: Delivering rapid, gentle drying and heat treatment of temperature-sensitive or heat-labile materials.

High temperature furnaces: Models characterized by outstanding safety, reliability, precise temperature control, low surface temperatures and best analysis purity.

Custom products: Incubators, ovens, tubes, bottles and adapters designed to meet unique customer requirements.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password

- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
