Life Medical Sciences, Inc. is a biomaterials company engaged in the development and commercialization of innovative and cost-effective medical devices for therapeutic applications. During 1998, the Company focused on the advancement and expansion of product development programs based on its proprietary bioresorbable polymer technology. The Company intends to apply its platform technology to the development of multiple products that address unmet therapeutic needs or offer improved, cost-effective alternatives to current methods of treatment. Products currently under development focus on preventing or reducing post-operative adhesions subsequent to a broad range of surgical procedures and are in various stages of clinical trials and preclinical studies. In January 1999, the Company initiated a pilot clinical trial for its REPEL-CV bioresorbable adhesion barrier film, the first surgical device approved by the FDA for human evaluation in the prevention of adhesions after open-heart surgical procedures. The Company has also developed a line of novel silicone gel-filled cushions intended for the prevention and management of hypertrophic and keloid scars.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
