Email:

Medtronic MiniMed is a world leader in insulin pump therapy and continuous glucose monitoring. Our first insulin pump, the Model 502, was introduced in July of 1983. Remarkably, a number of people continue to wear the same pump they purchased more than a decade ago. Today over 150,000 people enjoy the benefits of our insulin pumps. Our Company is firmly committed to helping people living with diabetes live healthier and more normal lives by providing superior technology and responsive customer support. Medtronic MiniMed provides assistance to its customers 24 hours a day, 365 days a year through our clinical services hotline, and is committed to educating the health care community by providing accredited continuing educational programs on insulin pump therapy. This includes a nationwide symposia series for physician and nurse teams, and a certified pump trainer program. Medtronic MiniMed takes great pride in setting the industry standard for customer service, advanced technology and educational programs, and is committed to creating greater awareness of insulin pump therapy and continuous glucose monitoring for the treatment of diabetes.

Medtronic MiniMed's vision is to eliminate the burdens associated with diabetes by creating an artificial pancreas. Along that path, we continue to develop advanced insulin pumps and continuous glucose monitoring systems for the treatment of diabetes. One day, these integrated systems will "close the loop" by making glucose sensing and insulin delivery automatic. Indeed, these are very exciting times for the Company, as we continue to make major advancements toward a vision that began nearly 20 years ago!

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password

- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's relate service indepth.

The annual cost is \$495.00 for established organizations and \$295.00 for organizations less than 12 months old.
