Proteome Generation Systems is a small private company specializing in the fields of proteomics and structural bioinformatics. We utilize our proprietary bioinformatics analysis technologies to produce high-quality, cost-effective solutions for our customers. Our technologies allow for protein folding and modeling, distant homology searching, motif locating, multiple alignments, proteomics database mining, phylogeny construction and much more. All employ breakthrough, revolutionary, and state-of-the-art approaches designed to achieve optimal performance. Put simply, we provide you with the most effective algorithms and the best tools available on the market today.

Additionally, our research efforts enable correlations to be drawn between the range of proteins produced by a cell or tissue, and the initiation or progression of a disease state. We actively identify new protein markers for diagnostic purposes as well as novel molecular targets for drug discovery. To this end we continue to apply our proprietary technologies to meet our goals.

We at Proteome Generation Systems wish to be included in the BioPortfolio.com services because we would like to increase exposure to our proprietary technologies and feel that we are well-suited for being included.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast

service

- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
