Applied Tissue Technologies LLC licenses advanced core technologies for wound healing and gene therapy. Our system for diagnosis and treatment of wounds controls the healing process and enhances wound healing. Our gene therapy technologies allow delivery of genetic material to skin, bone, and other tissues with or without viral vectors. Licensee partners can use these technologies for a wide variety of applications. Our technologies represent major opportunities for improvement in patient care with significant reductions in cost.

### Applied Tissue Technologies LLC Patents:

- 7422574- [Microseeding device for gene delivery by microneedle injection](#)
- 6525030- [Gene delivery to periosteal cells by microneedle injection](#)

## BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
