Serologicals is a leading worldwide provider of specialty human antibodies and other blood-related products and services to major healthcare companies. The Company's services, including donor recruitment, donor management and clinical testing services, enable the Company to provide value-added specialty antibodies that are used as the active ingredients in therapeutic products for the treatment and management of such medical indications as Rh incompatibility in newborns, rabies and hepatitis and in diagnostic products such as blood typing reagents and diagnostic test kits. In addition, the Company collects source plasma containing non-specialty antibodies from which a number of products, primarily intravenous immune globulin (IVIG), a product containing a broad spectrum of antibodies used in the treatment of a wide variety of medical indications, are derived. As of March 15, 1999, the Company conducted its operations through a national network of 64 donor centers and through laboratories located in the United States and the United Kingdom. The Company also operates two monoclonal antibody manufacturing facilities in Scotland. Furthermore, the Company operates a clinical trial site dedicated to the management and performance of clinical trials for the pharmaceutical and biotechnology industries. On December 29, 1998, subsequent to year end, the Company purchased substantially all of the domestic assets of Pentex Blood Proteins ("Pentex"), a unit of Bayer Corporation. Located in Kankakee, Illinois, Pentex supplies a broad line of purified animal and human blood proteins to the diagnostic and biopharmaceutical industries.

BioCorporate Profiles - upgrade to a full profile

BioPortfolio's BioCorporate full profiles offers your organization the opportunity to increase internet traffic to your corporate web site and enhance awareness of your business, technology, products and services. BioCorporate profiles are dynamic and are updated weekly with new information sourced from core information resources: publications, clinical trials, patents and global news.

Why you should upgrade your BioPortfolio BioCorporate profile:

- the ability to amend and add information on products and services to your profile using a membership username and password
- the option to add a corporate logo
- the creation of high value URL links back to your organization's website which will improve search engine ranking - resulting in increased site traffic
- the option have your press releases published on BioPortfolio and distributed via our BioNewsCast service
- an enhanced BioCorporate profile will also improve your exposure on BioPortfolio's related service InDepth and GeneDB

The annual cost is \$995.00 for established organizations and \$495.00 for organizations less than 12 months old.
