Table of Contents

eHealth Solutions for Pharma

Executive Summary	10	
The changing pharmaceutical marketplace	10	
eHealth solutions for the salesforce	11	
eHealth tools for reaching physicians	12	
Reaching physicians through eCME	13	
eCompliance	14	
eHealth solutions for clinical trials	15	
Chapter 1	The changing pharma marketplace	18
Summary		18
Introduction		19
Market challenges		20
Greater involvement of patients in prescribing decisions		20
Price controls, reimbursement policies and generics		21
Strong competition in high profit markets		22
Poor public perception of the pharmaceutical industry		22
The changing role of sales and marketing		23
Chapter 2	eHealth solutions for the salesforce	26
Summary		26
Introduction		27
Key challenges		29
eHealth strategies for the salesforce		30
eDetailing		31

	Physician demand for eDetailing services outstrips current supply	33
	Strong growth is expected in the use of representative-assisted eDetailing sessions	34
	Word-of-mouth as a method of recruitment	35
eSampling		36
	An inconsistent sample supply makes eSampling an attractive option for many physicians	39
	In support of ‘on demand’ sampling	39
Mobile capability and PDAs		41
Conclusions		43

Chapter 3 eHealth tools for reaching physicians 46

Summary		46
Introduction		47
Current approaches to physician-facing websites		48
Effective website strategies		51
Professional development		52
	Product and disease information	52
	Continuing Medical Education	57
	Online forums	58
Patient resources		62
	Patient education materials	63
	Clinical trial information	64
	Disease management and compliance tools	66
Blogging		68
Best advice for blogging		69
	Blogs as a market research tool	70
	Building a blogsite	70
Conclusions		75
Websites		75
Blogging		77

Chapter 4 Reaching physicians through eCME 80

Summary		80
Introduction		81
	Europe	82
	US	82

Online CME versus traditional CME programs	83
eCME activity	84
Geographical differences	86
Pharmaceutical industry sponsorship of eCME	86
Meeting the needs of physicians	89
Moving services from offline to online	89
Reduction in real-time CME events	89
Building effective eCME services	90
Success factors	92
eCME website visibility	93
Advertise	93
Organize	94
Deliver	94
Physicians have been disappointed in the quality of many eCME activities	95
Conclusions	99
A continuing role for pharmaceutical companies in CME	99
Does pharmaceutical sponsorship factor into physicians' decisions to use eCME?	100
Working with the eCME providers to develop educational opportunities	101

Chapter 5 eCompliance 104

Summary	104
Introduction	105
Barriers to effective communication in the EU	105
Barriers to effective communication in the US	106
Effective communication with patients	107
Disease management and compliance tools	107
Text messages and email reminders are the most popular consumer channels	108
Compliance programs	109
Technology to enable eCompliance	110
Main eCompliance channels	111
Online channels	111
Product websites can help boost compliance	113
Email reminders can work in some patient populations	114
PDA's – mobile access to online compliance tools	115
SMS messages provide a direct, personal reminder	117
Rapid answers to individual questions	117
Mobile phones as disease monitors	118
Mobile technology – increasing the options	118
Other tools	119
Key considerations for eCompliance tools	121
Using the right channel to relay the message	121

The age effect	121
eCompliance recommendations	122
eCompliance incentives	124
Demographic differences	125
Target conditions for ecompliance	126
eCompliance services	127

Chapter 6 eHealth solutions for clinical trials 130

Summary	130
Introduction	131
Market challenges	132
Clinical trial websites	133
Physician-facing clinical trial websites	133
Keeping physicians current	134
Use branded clinical trial websites to leverage existing relationships	135
Physicians need an online database for clinical trial outcome data	135
Conclusions	137
Index	138
