(<http://www.bioportfolio.com/indepth/Abortion.html>)

An abortion is the removal or expulsion of an embryo or fetus from the uterus, resulting in or caused by its death. This can occur spontaneously or accidentally as with a miscarriage, or be artificially induced by medical, surgical or other means. "Abortion" can refer to an inducing procedure at any point during human pregnancy; it is sometimes medically defined as either miscarriage or induced termination before the point of viability. Throughout history, abortion has been induced by various methods and the moral and legal aspects of abortion are subject to intense debate in many parts of the world.
