(<http://www.bioportfolio.com/indepth/Adenocarcinoma.html>) - Regularly Updated.

Adenocarcinoma is a cancer that originates in glandular tissue. To be classified as adenocarcinoma, the cells do not necessarily need to be part of a gland, as long as they have secretory properties. This form of carcinoma can occur in some higher mammals, including humans. The term adenocarcinoma is derived from 'adeno' meaning 'pertaining to a gland' and 'carcinoma', which describes a cancer that has developed in the epithelial cells. It can first present as an adenoma. ([From the Wikipedia article Adenocarcinoma](#).)
