

Immunocompetence

[View the current Immunocompetence InDepth page on BioPortfolio.com](http://www.bioportfolio.com/indepth/Immunocompetence.html)

(<http://www.bioportfolio.com/indepth/Immunocompetence.html>)

Immunocompetence is the ability of the body to produce a normal immune response following exposure to an antigen. Opposite of immunodeficiency. In reference to lymphocytes, immunocompetence means that a B cell or T cell is mature and can recognize antigens and allow a person to mount an immune response.
