(<http://www.bioportfolio.com/indepth/Lymphoma.html>) - Regularly Updated.

Lymphoma is a type of cancer that originates in lymphocytes . There are many types of lymphoma. Lymphomas are part of the broad group of diseases called hematological neoplasms. In the 19th and 20th centuries the affliction was called Hodgkin's Disease, as it was discovered by Thomas Hodgkin in 1832. Colloquially, lymphoma is broadly categorized as Hodgkin's lymphoma and non-Hodgkin lymphoma . Scientific classification of the types of lymphoma is more detailed. Although older classifications referred to histiocytic lymphomas, these are recognized in newer classifications as of B, T or NK cell lineage. Histiocytic malignancies are rare and are classified as sarcomas. ([From the Wikipedia article Lymphoma](#) .)
