(<http://www.bioportfolio.com/indepth/Neuroma.html>) - Regularly Updated.

Neuroma originally was defined as a tumor of a nerve. . Today, neuroma commonly refers to any tumor of cells of the nervous system. though some use the term only to describe tumors of the cell of the nerve and related fibers. Because of the ambiguity inherent to the term, it is usually better to use a more specific description when possible. Neuromas can be either benign or malignant. ([From the Wikipedia article Neuroma](#) .)
