(<http://www.bioportfolio.com/indepth/Pharyngeal.html>) - Regularly Updated.

Pharyngitis is, in most cases, a painful inflammation of the pharynx, and is colloquially referred to as a sore throat. Infection of the tonsils, tonsillitis may occur simultaneously. About 90% of cases are caused by viral infection, with the remainder caused by bacterial infection and, in rare cases, oral thrush. Some cases of pharyngitis are caused by irritation from elements such as pollutants or chemical substances. ([From the Wikipedia article Pharyngeal](#).)
