The United States Agency for International Development is the United States federal government organization responsible for most non-military foreign aid. An independent federal agency, it receives overall foreign policy guidance from the United States Secretary of State and seeks to "extend a helping hand to those people overseas struggling to make a better life, recover from a disaster or striving to live in a free and democratic country..." USAID advances U.S. foreign policy objectives by supporting economic growth, agriculture and trade; health; democracy, conflict prevention, and humanitarian assistance. It provides assistance in Sub-Saharan Africa; Asia and the Near East, Latin America and the Caribbean, Europe, and Eurasia. USAID is also organized around four main pillars: Global Development Alliance; Economic Growth, Agriculture, and Trade; Global Health; Democracy, Conflict, and Humanitarian Assistance.
