(<http://www.bioportfolio.com/indepth/Xerostomia.html>)

Xerostomia is the medical term for a dry mouth due to a lack of saliva. Xerostomia is sometimes colloquially called pasties or cottonmouth. Xerostomia can cause difficulty in speech and eating. It also leads to halitosis and a dramatic rise in the number of cavities, as the protective effect of saliva is no longer present, and can make the mucosa of the mouth more vulnerable to infection. Notably, a symptom of methamphetamine use usually called "meth mouth" is largely caused by xerostomia. ,
